

OCTOBER 29TH LAKES BASIN FIELD TOUR

The Feather River Stewardship Coalition Invites You

To a tour of meadow restoration areas within the Lakes Basin. Meadows provide crucial habitat for unique flora and fauna and are slowly diminishing through conifer encroachment. Bring your camera and your hiking boots to come join us on a tour of meadows and aspen stands in the Lakes Basin – enjoy the fall colors and learn about the management of these special resources.

*For more information or RSVP,
contact Rachael Norton, FRSC Outreach at (530) 238-7206*
